

**ONLINE LEARNING:
PROVEN CAPABILITY & CAPACITY**

Online learning has exploded over the past decade. This trend will continue to accelerate. In keeping pace with this trend, the RESC Alliance has responded by developing successful online learning options to meet the needs of both students and educators.

Ensure that CT districts have the ability to choose among online learning providers.

- The **six Regional Educational Service Centers (RESCs)** currently provide access to a variety of **online programs and solutions** for adults and students.
- By providing **multiple options**, the RESCs help schools meet the unique needs and challenges of today's learners.
- As part of our core mission, the RESCs can bring greater **economies of scale** to schools to provide these options in the most cost-effective ways.

EXAMPLES of RESC ALLIANCE ONLINE SERVICES
